

DISASTER RECOVERY-AS-A-SERVICE

Highlights

- Cost-effective data replication options
- Flexible replication and recovery
- Customized recovery hardware with predefined Service Level Agreements

The Converge Enterprise Cloud Disaster Recovery-as-a-Service Solution provides cost-effective data replication and recovery options, generating faster recovery times and superior data security.

Flexible Replication and Recovery

Our flexible replication management offerings enable our clients to leverage their existing resources or to utilize our expertise. We strive to make our solutions as accommodating as possible without ripping and replacing. Our flexible recovery options include:

- Customized recovery hardware with SLA's to meet your RTO's
- UCS Blade Chassis on-site to facilitate most VM requirements
- Individualized services to meet your recovery needs

Cost Savings

Converge Enterprise Cloud Disaster Recovery-as-a-Service drives down operational costs, eliminating the need to store, maintain, and transport tapes. DRaaS allows clients to use disk-to-disk replication to ensure optimal efficiency and security of their data.
